

Registrants without distance experience may estimate distances based on the operation of the fleet during the period for which registration is required.

This worksheet may only be used if either of the following apply:

- 1) A contract or lease has been executed by the applicant providing the applicant to carry freight (or passengers – if passenger operation) over routes of travel during the registration year.
- 2) A business plan has been completed which substantiates the estimated distance provided.

The MPI Prorate Office may at any time request support documentation of 1 or 2 above.

**Instructions:**

Your total Manitoba kilometers must include travel to and from the provincial boundaries as well as local travel within the province.

For each trip, list the new jurisdiction(s) through which you may travel; the estimated kilometres traveled within that jurisdiction; and estimated number of trips and vehicles. This should yield the total estimated kilometers that you are reporting.
