DATE: 27 AUG 2018

As a result of your recent driving incident(s) listed below, we would like to tell you about the Driver Improvement and Control Program.

04 AUG 18 CONVICTION SPEEDING RICHER 18:50 HRS

Studies show that people who commit a driving infraction or cause a collision are statistically more likely to have another. Knowing this can help keep you and your passengers safe, if you focus on driving safely.

Through early intervention and awareness, the Driver Improvement and Control Program is designed to check bad driving habits before they start. Based on the seriousness of a driver's involvement, the program proceeds through stepped interventions to help keep our roads safer. The enclosed brochure is sent for informational purposes **only** and explains the Driver Improvement and Control Program in more detail.

Please keep in mind that unsafe driving can have other consequences such as fines and extra insurance premiums. One of our goals is to help you avoid these extra costs.

Your safety and the safety of all Manitobans remains our first priority.
